

Manual for Android App

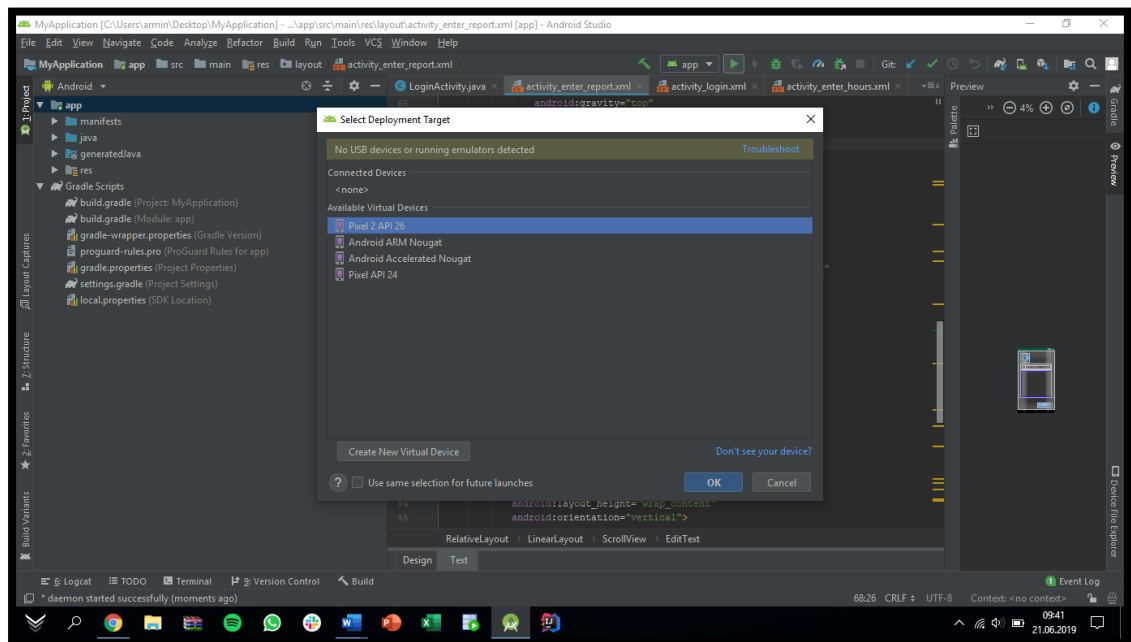

Project name	BauX
Project leader	Armin Hamzic
Project members	Pero Djukic Amin Taha
Version	2.0
Document state	In process

1. Starting the App

Install Android Studio if it is not installed on your computer yet.
Open your Android Studio and open the project called MyApplication.
After that you click on the start-button right on the top.

Then you select a virtual device, which you want to use to start the app.

After you have selected a virtual device, a virtual smartphone will appear on your screen and the app will start automatically. Now you can start using the app.
